

Safety Training

Green Country Technology Center offers flexible, affordable and comprehensive safety training to businesses in our area. Training can be scheduled 24 hours a day, seven days a week to fit your shift schedule. Training classes are provided at a reasonable cost to public and private employers through special funds set aside by the state of Oklahoma for workplace safety training. The center has an up-to-date training library, the ability to design programs to fit your workplace and training center.
